## Professional Summary

Computer Science and Engineering student with hands-on experience in Artificial Intelligence, Machine Learning, data analytics, and full-stack development, backed by a strong foundation in Data Structures & Algorithms, Object-Oriented Programming, and DBMS. Built AI-driven applications (real-time proctoring, emotion-based recommendations) and scalable web platforms; seeking a Software Development or AI/ML role to deliver innovative solutions.

## Education

**The National Institute of Engineering** **2023 – 2026**
*Bachelor of Engineering – Computer Science and Engineering*

**JSS Polytechnic** **2020 – 2023**
*Diploma in Computer Science*

## Experience

**MathCo** **Sep 2026 – Present**
*Trainee*

- Contributing to a GE Vernova capstone project to develop a PMO dashboard for monitoring project performance.
- Analyzed data sources and defined KPIs to track project progress, delivery, and risks.
- Supporting data integration, data modeling, and dashboard design to enable data-driven decision-making.

**Technologics Global Private Limited** **Jan 2026 – Jul 2026**
*AIML with Data Science Intern*

- Engineered an AI-powered Attention Shift Detector for online exam proctoring using YOLO11, MediaPipe, and OpenCV, enabling real-time face, eye, and head-pose tracking to flag attention shifts and suspicious behavior.
- Applied core AI/ML concepts across data preprocessing, model development, and data analysis using Python and machine learning tools.

**Sahasra Technology and Consultancy** **Jan 2025 - Mar 2025**
*Full Stack Developer Intern*

- Developed a Vehicle Tracking System in Python and Django, integrating the Google Maps API for real-time geolocation tracking and improved scalability and response times.
- Implemented secure user authentication with Django's built-in tools, optimized SQL queries, and improved reliability through better resource management and error handling.

## Projects

**AI Document QA** | *Python, Streamlit, LangChain, Ollama LLM*

- Built a document Q&A tool that lets users upload documents and receive accurate, real-time answers using LangChain and a locally hosted Ollama LLM.

**Feelify** | *Python, DeepFace*

- Designed a music recommendation system that detects emotion from facial expressions using DeepFace and suggests personalized songs based on mood.

**WatchHub** | *Python, Django, JavaScript, HTML, CSS*

- Developed a full-stack video streaming platform supporting user registration, content browsing, and smooth video playback.

## Skills

**Languages:** Python, Java
**Technologies & Tools:** HTML, CSS, MySQL, Artificial Intelligence, Machine Learning, Git
**Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS

## Certifications

- **Agentic AI foundation Associate** – Oracle
- **Fundamentals of Machine Learning and Artificial Intelligence** – AWS
- **Introduction to AI** – LearnTube
- **Machine Learning** – University of Washington (Coursera)
